K. England Exchequer.

A SCHEME *for Raiſing* 1,500,000 l. *upon Talleys and Orders payable in Courſe out of a Fund of* 140,000 l. per ann. *to be Settled for Thirty Two Years, with ſuch certain Increaſe of Principal from* 10 l. *to* 30 l. *on each* 100 l. *and ſuch Premiums as are mention'd in the following Table.*

THERE will be an unqueſtionable Fund ſettled to ſecure the Payment of the ſaid 140,000 *l. per ann.* during the ſaid Thirty two Years.

The 1,500,000 *l.* will be divided into 15,000 Shares, or equal Parts, of 100 *l.* each, being 1,500,000 *l.*

Receipts will be given for each 100 *l.* contributed, to be number'd progreſſively from *N°* 1. to *N°* 15,000, both Numbers incluſive.

There will be a Drawing of 15,000 Numbers, anſwering the Numbers of the Receipts, to aſcertain the Courſe or Order of Payment: And every Receipt will be paid in the numerical Order which the Number in ſuch Drawing, correſponding to the Number of the Receipt, ſhall come up in.

The whole will be divided into five Claſſes, each Claſſis conſiſting of ſo many Numbers of Receipts, and ſuch Principal Mony, with ſuch certain Increaſe of the Principal and Intereſt, and the Chance for ſuch Premiums, as are ſet againſt each reſpective Claſſis in the following Table.

The TABLE.

	Number of Receipts.	*Principal Sums contributed.*	*Principal Sums to be repaid for each* 100 l. *contributed, according as their Courſe for Payment ſhall happen.*	*Intereſt* per ann. *for each* 100 l. *contributed till repaid.*	*Total Principal Sums to be repaid.*	*The Great Premiums in the reſpective Claſſes.*		*First and Second Year's Intereſt of the Great Premiums.*		*Premium for First and Laſt Number of each Claſſis.*	
		l.	*l.*	*l. s.*	*l.*	*l.*	*l.*	*l.*	*l.*	*l.*	*l.*
1ſt Claſs.	1,000	100,000	110	6 12	110,000	.....	....	.....	...	2 of 500	1000
2d Claſs.	2,000	200,000	115	6 18	230,000	2 of 5,000	10,000	4 of 300	1,200	2 of 500	1000
3d Claſs.	3,000	300,000	120	7 4	360,000	4 of 5,000	20,000	8 of 300	2,400	2 of 500	1000
4th Claſs.	4,000	400,000	125	7 10	500,000	6 of 5,000	30,000	12 of 300	3,600	2 of 500	1000
5th Claſs.	5,000	500,000	130	7 16	650,000	4 of 5,000 1 of 20,000	40,000	8 of 300 2 of 1200	2,400 2,400	2 of 500	1000
	15,000	1,500,000			1,850,000	17 Prem.	100,000	34	12,000	10	5000
						34	12,000				
						10	5,000				
					Total Premiums	61	117,000				

The Number which comes up next before each of the ſaid Premiums of 5000 *l.* and 20,000 *l.* to have the firſt Year's Intereſt of that Premium; and the Number which comes up next after every of the ſaid Premiums, to have the ſecond Year's Intereſt of that Premium, beſides the Principal Sum contributed, and the reſpective Increaſes thereof.

Firſt Claſſis. The firſt thouſand Numbers which ſhall come up in the Drawing, will be the firſt 100,000 *l.* to be repaid with the Increaſe of 10 *l.* upon each 100 *l.* and Intereſt at 6 *l. per Cent. per ann.* being 6 *l.* 12 *s. per ann.* for the Intereſt of the ſaid 110 *l.* beſides the Premiums for the firſt and laſt Number.

Second Claſſis. And the next two thouſand Numbers which ſhall come up in the Drawing, will be the next 200,000 *l.* to be repaid with the Increaſe of 15 *l.* upon each 100 *l.* and Intereſt at 6 *l. per Cent. per ann.* being 6 *l.* 18 *s. per ann.* for the Intereſt of the ſaid 115 *l.* beſides the Premiums in that Claſſis.

Third Claſſis. And the next three thouſand Numbers which ſhall come up in the Drawing, will be the next 300,000 *l.* to be repaid with the Increaſe of 20 *l.* upon each 100 *l.* and Intereſt at 6 *l. per Cent. per ann.* being 7 *l.* 4 *s. per ann.* for the Intereſt of the ſaid 120 *l.* beſides the Premiums in that Claſſis.

Fourth Claſſis. And the next four thouſand Numbers which ſhall come up in the Drawing, will be the next 400,000 *l.* to be repaid, with the Increaſe of 25 *l.* upon each 100 *l.* and Intereſt at 6 *l. per Cent. per ann.* being 7 *l.* 10 *s. per ann.* for the Intereſt of the ſaid 125 *l.* beſides the Premiums in that Claſſis.

Fifth Claſſis. And the next and laſt five thouſand Numbers which ſhall come up in the Drawing, will be the next and laſt 500,000 *l.* to be repaid with the Increaſe of 30 *l.* upon each 100 *l.* and Intereſt at 6 *l. per Cent. per ann.* being 7 *l.* 16 *s. per ann.* for the Intereſt of the ſaid 130 *l.* beſides the Premiums in that Claſſis.

And every Contributor will be repaid the Principal Sum contributed according as his Courſe for Payment ſhall happen, with ſuch certain Increaſe of Principal on each 100 *l.* and the Chance for ſuch Premiums, as in the foregoing Table.

And not only the Principal Sums contributed, but alſo the ſaid certain Increaſe thereof, and likewiſe the Premiums will carry Intereſt at 6 *l. per Cent. per ann.* from the 29th of *September* next till paid; which Intereſt will be payable quarterly.

The Premiums will be paid in ſuch Courſe or Order, as the Number ſhall happen to come up, unto which the ſame ſhall belong.

The Sums contributed will be payable in four equal Payments, with a Diſcount of 8 *d. per Cent. per diem* for the firſt quarter part, and 4 *d. per Cent. per diem* for the laſt three quarter parts, from the reſpective times of paying thereof until the 29th of *September* next.

The Receipts will be ſo contriv'd, as that the Drawing may begin in *June* next, tho the whole Mony be not then paid in, and will be finiſh'd in leſs than three Weeks. And when the Drawing is over, and all the Mony is paid in, the Receipts are to be exchang'd for Orders for the whole Sums they ſhall be reſpectively intitled to, payable in ſuch Courſe as they ſhall have happen'd to fall in reſpectively by the aforeſaid Drawing.

Note. It is expected, That the Funds deſign'd for this Scheme will pay off above the firſt 100,000 *l.* by *Michaelmas* next; which if they do, the whole will be paid off in about 25 Years or leſs. But ſhould they produce only 60,000 *l.* by *Michaelmas* next, the whole will be paid off in about twenty eight Years, tho the Fund be given for thirty two Years.

The Advantage of this Scheme is, Thatevery Contributor has a great and certain Increaſe both of his Principal and Intereſt, according to the Diſtance of his Courſe for Payment; beſides a Chance for the Premiums, which amount to 117,000 *l.* being as much as all the large Benefits in the laſt Year's Lottery.

There are no large Premiums to the firſt 1000 Numbers, or firſt 100,000 *l.* to be repaid, becauſe it is computed they will be all paid off about *Michaelmas* next: And the large Premiums which are appropriated to the ſeveral other Claſſes, do increaſe in Number and Value, as the ſame Claſſes are for larger Sums, and remoter in Payment.

And whereas ſeveral Perſons may have great Quantities of Plate which are uſeleſs, and the coining the ſame into Mony may be ſerviceable to the Publick:

Every Perſon who ſhall bring any Plate to the Mint to be coin'd, ſhall be allow'd an encouraging Price for the old Standard, and proportionably for the new Standard; and ſhall immediately have a Receipt from the proper Officers of the Mint for the Plate ſo brought in, expreſſing the Sum it amounts to, at the Price to be allow'd: All which Receipts ſhall be taken in all or any of the ſaid Payments, for the full Mony the Plate therein contain'd amounts to at the Price to be allow'd, and in the firſt Payment and Admiſſion into this Fund, ſhall have the preference of any other Species whatſoever, and the Bearer thereof ſhall be firſt admitted thereto.

That any Companys or Corporations, Colleges or Halls in either of the Univerſitys may bring in their Plate to be coin'd, to be put into this Fund, and have the Intereſt till the Principal come in, to be apply'd to the uſe of ſuch Companys, Corporations, Colleges and Halls, and the Governours, Heads, Maſters, and Fellows thereof, in ſuch manner as if the ſame were purchas'd by or given to them in their Politick Capacity: But when the Principal Mony is repaid, the whole Principal Mony contributed, together with the Increaſe of the Principal hereby given, ſhall be apply'd to buy for the uſe of ſuch Company, Corporation, College or Hall, the like Pieces of Plate of the like Sort and Weight, and (where given by any Donor) with the like Arms and Inſcriptions as that melted down; or for purchaſing ſome Increaſe to the Revenues of ſuch Companys, Corporations, Colleges or Halls.

That the Officers of the Mint, ſo ſoon as the Plate ſhall be brought into the Mint, ſhall coin the ſame into Shillings and Sixpences only, and pay the ſame into the Exchequer as Mony advanc'd on this Fund.

A SCHEME FOR

Raiſing 1,500,000 *l.* upon Tal-leys and Orders payable in Courſe out of a Fund of 140,000 *l. per ann.* to be Settled for 32 Years, with ſuch certain Increaſe of Principal from 10 *l.* to 30 *l.* on each 100 *l.* and ſuch Præmiums as are mention'd in the following Table.

LONDON, April the 6th, 1711.
